## INTERNSHIP

**GOSPACE**, APRIL 2020 - JUNE 2020

1. Managed a Wordpress based website and fixed issues on the website.
2. Posted Tech related contents on the website regularly.
3. Made Newsletters for sending emails to subscribed users.

**MCNRG**, NIT DURGAPUR, MAY 2019 - JULY 2019

1. A text classification model which classifies texts collected from different resources and informs about the need of resources in disastrous areas.
2. Used Python, Machine Learning modules and Natural Language Processing(NLP) to build the text classification model based on a supervised approach.

## PROJECTS

### BLOG APP USING DJANGO

A Blog App where users can post articles regarding anything and read others articles. Users can also update and delete their articles in future by just logging in to their account. Used HTML, CSS for the frontend, BOOTSTRAP for a better user interface and DJANGO framework for the backend part.

### TO-DO APP USING DJANGO

A To-Do App where users can add their pending work and deadlines so that they don't forget to complete it by the time. Used HTML, CSS for the frontend, BOOTSTRAP for a better user interface and DJANGO framework for the backend part.

### SAE INDIA, NITDGP WEBSITE

Made the website of SAE India, NIT Durgapur where one can get information regarding all the activities in the club. Used HTML,CSS, BOOTSTRAP for the frontend and Django framework for backend.
